

Maths: KS2

What Age?

Can you work out how old people were when they died?

Find 10 headstones in the cemetery that do not tell you how old people were when they died. Write down their name, year of birth and year of death in the table below. Can you work out how old they were when they died?

Name	Year of Birth	Year of Death	Age

Use this space for your workings out:

Mean, median, mode and range

1. What is the mean number of the ages you have written down?
Remember, if you have chosen different graves to your friends, your answers will not be the same.

My mean number is: _____

2. What is the:

median value in your list: _____

the range of your numbers: _____

the mode: _____
