

# Science: KS2

## Animal Detective!

Look around you. What evidence can you find for animals, birds and insects in the cemetery? Where might they live? What would they eat?

Look closely at leaves to see if anything has been nibbling them. Look for droppings (that's poo to you!). You might also find evidence that one animal has eaten another!

Where in the Cemetery	Animal evidence	What would they eat?	Where would they live?

**Vocabulary:** feathers, slime, droppings, singing, hair, nibbled, holes, nest
